PROFESSIONAL SUMMARY

Frontend Engineer with more than 18 years of experience in developing, maintaining, and modernizing web applications. Expertise in solution architecture, accessibility, performance, and technical SEO, utilizing ReactJS, JavaScript, and TypeScript. Contributed to 50+ projects of varying complexity, including legacy system migrations and feature leadership within multidisciplinary teams

LANGUAGES

Portuguese: Native | Spanish: Advanced (C1) | English: Upper-Intermediate (B2)

EDUCATION

- **Postgraduate Degree in Neuroscience and Behavior** | PUCRS (2020 – 2021)
- **Graphic Design | Instituto Infnet** (2007 – 2011)

CONTINUING EDUCATION

- **Architecture & Frontend**: Applied Software Architecture, Monorepos with Nx, Next.js & React.js (Advanced), Next.js with GraphQL, Vite, State Machines (Platzi, 2025–2026).
  Design Systems & UI/UX: Design System Fundamentals, Effective Design Systems, Figma, CSS Architectures (Platzi, 2025–2026).
- **Security & Performance**: Web Security with OWASP, Technical SEO, Debugging with Chrome DevTools (Platzi, 2025–2026).
- **AI & Automation**: AI Native Development with Copilot, MCP, Agents, Tasks & Skills (Rocketseat, 2026);
- **Automation** with n8n, Ethical AI Product Design, Intro to AI (Platzi, 2024–2026).

PROFESSIONAL EXPERIENCE

Founder & Frontend Engineer | Product & Architecture — AKTIV+ (Jul 2026 – Present) | REMOTE

- Designed and built AKTIV+, a digital platform supporting people with Parkinson's, families, and caregivers, grounded in neuroscience and technology.
- Structured the monorepo and multi-tenant architecture (TypeScript, PostgreSQL, CASL for RBAC/ABAC), following SOLID principles and OWASP security standards.
- Designed layouts and the design system in Figma, prioritizing motor and cognitive accessibility.

Stack & Practices: React.js, Next.js, TypeScript, Python, Turborepo, Figma, Design System, SOLID, OWASP, CI/CD, Technical SEO, i18n, AI-assisted development, ADRs.

Result: Structured a B2B subscription product with multi-tenant support for clinics and institutions, with accessibility and i18n from the start.

PROJECTS & CONSULTING

- **WX+ (2025) | Branding & Architecture | REMOTE**
  Created the visual identity (logo, colors and typography),defined the project architecture and developed a landing page, dashboard and design system in ReactJS, with a UI/UX focus. (Stack: ReactJS, TypeScript, Figma, Design System, CI/CD, Technical SEO, i18n)
- **DFTINFO (2024) | Branding & Architecture | REMOTE**
  Adapted the brand identity, defined the frontend architecture and built the institutional portal in Astro. (Stack: Astro, TypeScript, Figma, Design System, CI/CD, Technical SEO, i18n)

Career Break | Family Care (Feb 2023 – Feb 2024)

Full-time dedication to family care.

Frontend Developer | Solution Architecture — V.tal (Oct 2021 – Feb 2023) | REMOTE

- Worked on solution architecture for legacy systems, mapping and defining technical standards.
- Led Scrum ceremonies, mapped security vulnerabilities and contributed to building the bilingual institutional website.

Stack & Practices: ReactJS, OWASP, Agile methodologies, Legacy Architecture Migration.

Frontend Developer — Oi (Sep 2020 – Oct 2021) | REMOTE

- Contributed to the migration of the Oi Soluções portal and led the decoupling of 13 interdependent products, enabling independent deployments in Jenkins, with faster releases and fewer errors.
- Defined technical SEO and URL redirect strategies, preserving search engine rankings.
- Documented the architecture, aligned deadlines with stakeholders and worked closely with QA to reduce rework.

Stack & Practices: ReactJS, CI/CD, Jenkins, AWS, Technical SEO, Agile Conflict Mediation.

Frontend Developer — Elumini, consulting for Oi (Sep 2019 – Sep 2020) | ON-SITE

- Maintained and evolved Oi's e-commerce platform, implementing new checkout workflows and subscription plan features.
- Coordinated the handling of 300+ security vulnerabilities.
- Enhanced Oi's FAQ search with Elasticsearch.

Stack & Practices: Oracle Commerce Cloud (OCC), JavaScript, Knockout.js (MVVM), OWASP, Atomic Design, BEM, ITCSS.

Previous Experience (2008 – Feb 2018) | ON-SITE | HYBRID

- Modernized web applications (portals, e-commerce and institutional sites) for Globo, ECAD, Abramus, Dannemann Siemsen, Instituto Superar, Wooza and Escola 24Horas.
- Migrated monolithic applications to SPAs (AngularJS, Vue, React.js), with extensive regression testing and digital product transitions.
- Implemented accessibility best practices (semantic HTML, ARIA, JAWS, Lighthouse), technical SEO, Mobile-First design and API integrations.

Stack: JavaScript (AngularJS, Vue, React.js), HTML, Sass, BEM, ITCSS, Git, Magento, GTM, Lighthouse
